

Cleaning glass & Framing

1: always remove most dirt with a clean cloth first

2: clean the glass with an appropriate neutral product (e.g. Instantel) or with warm water with a splash of vinegar (to degrease)

3: or with very fine steel wool 000 to remove difficult stains

4: and if necessary, brush off with hand brush or duster or blow off the remaining dust particles

5: dust off the back (dust particles may stick to the sides)

6: dust off the rebate of the frame

7: put the back on the worktable and position the picture to be framed on the back

8: put the glass on the picture, so that you can see if there are no dust particles left behind the glass and if the glass is clean

9: put the frame on top of it

10: only if all parts are assembled, turn the whole

11: fasten the back to the frame with leafsprings, turnbuttons, flexitabs or nails
